How to Connect to the UBC VPN

For any UBC web site that requires remote access via the UBC VPN, the installation instructions for installing the UBC VPN (Cisco AnyConnect app) can be found here: https://it.ubc.ca/services/email-voice-internet/myvpn/setup-documents.

Some UBC web sites are accessible from anywhere without needing the UBC VPN.

NOTE1: The VPN server name is **myvpn.ubc.ca** and you log into it with your CWL and password.

NOTE2: **As of July 22, 2024, MFA (multifactor authentication) is now enabled on all UBC VPN access.** Please see the special instructions for connecting to the VPN on the main Law IT Help web page under "UBC VPN – How to Connect".
